Portable Starting Unit Model 1324-1QC

Patent Pending

[Email this page](#)

Model 1324-1QC

- 13 AMP hours @ 10 Amp Hour Rate
- All in one air portable/carry on START PAC®
- 1300 AMPS Peak Current complete with built in charger, power plug and cables.
- 15.5"x4"x11.75"
- 35 LBS. Complete
- Units are 24 VDC output with a universal charger that will accept 90-240 VAC 50/60 hertz.
- Not to be used as an aircraft battery charger.

NOTE: When storing this Start Pac® for more than 30 days, remove the two batteries and store separately.

The new patent pending Start Pac® 1324-1QC has separate removeable batteries that can be changed in 15 seconds. This feature allows the user to change the batteries in the field without needing to send the Start Pac® back to the shop or manufacturer.

The Model 1324-1QC is a 24 volt unit. The 1324-1QC will start turbine or piston engines up to 500 horse power. This unit has a 4.5 amp charger and will provide a charge time of approximately 4 hours. These units will give two to three starts between charges. Certain aircraft will allow the ship's generator to back charge a GPU. In this manner, Start Pac® can be recharged in the field without an AC source indefinitely.

This portable unit is mainly designed for emergency starting in remote locations.
This unit is not designed for repeated daily starts or maintenance functions.

Batteries have no memory effect and can be recharged at anytime.
Made in the USA.

Certified

CE marked if purchased through [Airpart UK](#)
