### Model 2300 QC

All In One air portable/carry-on START PAC® with built in chargers, power plug and cables.

26 AMP hours @ 10 Hour  
Rate  
2300 AMPS Peak Current  
Available with separate  
trolley  
19.2"x7.5"x11.5"  
69 LBS. Complete  
Not to be used as an  
aircraft battery charger.

Units are 24/26 VDC output, with universal chargers that will accept 90-240 VAC 50/60 hertz.

NOTE: When storing the Start Pac® for more than 30 days, remove the battery box from the charging unit and store separately.

The new patent pending **Start Pac® 2300QC** has a separate removable battery that can be changed in 10 seconds. This feature allows the user to change batteries in the field without needing to send the Start Pac® back to the shop or Manufacturer.

The Model 2300QC can be used for starting engines up to 1500 horse power and give four to six starts between charges. This unit has a dual redundant 4 amp chargers.. When plugged into an AC source, 8 amps at 28VDC, is available for maintenance functions without depleting the batteries. Recharge time is approximately 3-1/2 hours. Certain aircraft will allow the ship's generator to back charge a GPU. In this manner, this portable battery pack can be indefinitely recharged in the field without an AC source.
