Model 3324QC-400 amp

DESCRIPTION

These ground power units are designed to perform starting, powering up aircraft systems and maintenance functions. When connected to AC power, the depleted batteries can be charged in a matter of hours with the built in power supply/battery charger.

The 3324 contains a full 24-volt battery bank for starting and a large power supply to provide a continuous current at 28.5 Volts DC for maintenance. This mobile GPU is configured with a 400 amp power supply. This will satisfy the ground power requirements of most business jets, and includes on-board air conditioning and other high draw aircraft systems.

We also custom manufacture Start Pac® units in various combinations of batteries and 28 volt power supplies to meet customers' exact requirements.

The Model 3324-300 amp GPU is a combination power supply and battery pack.

SPECIFICATIONS

Batteries

- 26 Amp Hours at 10-hour rate
- 24 Volt DC – 25.5 Volts at rest
- Sealed cells – non-hazardous
- Valve regulated high amperage output lead acid
- 2800 Peak Amps
- Patented Quick Change design for 10 second battery changes

Power supply/charger

- 200 Multi- unit 300 Amp DC continuous output
- 28 – 28.5 Volt output from 0 – 300 amp load
- No duty cycle, clean continuous power
- Over-voltage & over-current protection
- Reverse polarity protection
- Battery recharge time: 1-4 hours
- AC Input – 220 Volts only

Batteries have no memory effect and can be recharged at anytime. Made in the USA.

All Start Pac™ products come with a 1-year warranty on workmanship and materials. Batteries are cycle-dependent and therefore are not covered under this warranty. Please handle this unit in a responsible manner. Start Pac™ is not responsible for damages caused by misuse or neglect.
