Model-3370RR

DESCRIPTION

This Patent Pending American made jump starter is a larger version of the popular 3324RR. This heavy duty mobile unit is designed for engines up to 6000 horse power or for multiple daily locomotive engine starting requirements.

The 3370RR will reduce operating costs by improving safety and efficiency in the field. This mobile starter can be pulled by hand or can be manufactured without wheels and handle to be truck mounted.

The 3370RR is comprised of two main components: a large battery bank for jump starting and high tech battery chargers to maintain battery health and performance. The unit should always be recharged after use and left charging when not in use to gain the maximum life and use of the unit.
